RE: Board of Selectmen's Meeting

Dear Pondicherry Concerned Citizens Group,

The Board of Selectmen have received your letter and request to present to us. While we agree health care in Bridgton has degraded severely, I do not believe the Board can publicly support a private business organization. While we want a new health care organization to come and revitalize our once great system, we believe this is up to private businesses to decide through business practices they see fit to convince the citizens of Bridgton that they are the best choice.

I believe that speaking to us at a meeting is appropriate to get the word out about your mission but all we can do is listen to your ideas and absorb your information. I believe that once a business has committed itself to owning real estate and has a business plan for folks to see, then I am fairly confident that they would be supported by our Board and welcomed to our community.

Please let me know if still you intend to come on the 22nd to share your story but please understand as public servants to our Town we cannot endorse your business plan over another organization.

Best Regards,

Liston (Lee) E. Eastman
Chairman, Board of Selectmen
